ASTRAPACK

AI-Native, Not AI-Reactive

Rethinking How We Build Companies and Careers

Nick Smith / LLMday Austin / October 14, 2026

Several forces changed the workplace

Pandemic expansion

Growth assumptions changed. Companies revisited their plans.

Organizational choices

Leaders reduced layers and reprioritized work.

AI capability

New tools changed what some workflows could deliver.

Public sources: Meta’s Nov. 2022 SEC filing and Mar. 2023 website update.

Two ways to prepare for change

AI-reactive

A career scrambling after a transition.

A company adding AI after the staffing plan.

AI-native

A career building capability continuously.

A company testing AI as part of work and growth planning.

A working distinction for this talk. Established teams can begin now.

AI fluency in everyday work

01

Outcome

What should this deliver?

02

Context

Which inputs are safe?

03

Review

How will you check?

04

Ownership

Who makes the call?

A recruiter’s workflow

The input

A role brief and agreed hiring criteria.

AI assistance

An intake checklist, organized evidence, and draft questions.

Recruiter judgment

Challenge assumptions, verify claims, and lead the conversation.

Illustrative workflow. The recruiter owns the recommendation.

Productivity needs a baseline

15%

more issues resolved per hour

Study of 5,172 support agents
Generative AI at Work (2024)

For your own workflow

Total time, including review

Accuracy and usefulness

Rework and downstream effort

Results vary by setting. Task gains do not translate directly into staffing cuts.

Hiring around demonstrated capacity

Demand	What work must the team deliver?
Tested capacity	What can the full workflow sustain?
Human judgment	Where do expertise and accountability remain?
Staffing choice	Develop, redeploy, hire, contract, partner, or wait.

AI inside the tools people already use

Project management

CAD

Workforce planning

Hypothetical integration and workforce-planning example.

The people-first commitment

Learning time and support

Sustainable workloads

Development and redeployment

Leaders remain responsible for the choices that follow productivity gains.

Human connection in hiring

Useful assistance

Scheduling
Preparation
Evidence organization

Accountable people

Context and clarification
Decisions and explanations
A way to correct errors

Consistent criteria and review matter for human decisions, too.

The job search as a working system

Track

Relevant roles and next steps

Research

Verified contacts and context

Prepare

Real examples and practice

Follow through

Reviewed outreach and reminders

AstraPack’s candidate workspace

Job tracking
Contact discovery
Outreach preparation
Follow-up organization

In development for our coaching clients. Human review and action remain central.

Evidence of your capability

What you can show

A real workflow.
What AI helped with.
What you checked.
What happened.

What you can ask

How has this role changed?
What training is available?
Who reviews the work?

Use AI in assessments only within the stated rules.

A seven-day starting point

01

recurring workflow

Define a useful result.

Build in a review step.

Compare quality and total effort.

A small experiment you can keep, revise, or stop.

ASTRAPACK

AI-Native,
Not AI-Reactive

In the companies we build.
In the careers we shape.
